

Welcome to the Mississippi State Resource page! This presentation will guide you through the website, your go-to resource for learning about Pulsara, signing up, and implementing Pulsara MED OPS.

Hospital Functionality by Package

BUNDLE OPTIONS

All hospital bundles include either Pulsara **ONE** or Pulsara **MED OPS** Infrastructure Package. Hospitals can upgrade to Pulsara **UNITED** which includes all hospital functionality OR they can add Pulsara **TRANSFER OPS** and/or Pulsara **SELECT** to meet their needs.

Multimedia Prehospital Report (ECG, Video, PSR...)	✓ ALL	✓ ALL
Send Consult/Transfer Request	✓ ALL	✓ ALL
State Regional: Incidents, Events, Evac, ESF8 & other Initiatives		✓ ALL
Receive Consult/Transfer Request		✓ ALL
Add Physician Consultants for Consult & Transfer Request		
Add Physician Consultants All Methods of Arrival (EMS, ED, Inpatient, Transfer)		
Add Downstream Teams (STEMI, Stroke, Trauma...) All Methods of Arrival (EMS, ED, Inpatient Transfer)		

Many regions across the state have successfully implemented Pulsara as part of a STEMI and Stroke initiative. If you haven't expanded use beyond these patient types, we encourage you to check out our enhanced workflows that simplify patient movement for all encounters.

Pulsara ONE is our foundational infrastructure package designed to modernize EMS-to-ED prehospital notifications. It replaces traditional notification methods for all patient types while enabling ECG attachments and live video.

This essential functionality is offered nationwide at no cost to participating First Responder Organizations, EMS Agencies, and Hospitals—no hidden fees, no catch. It's simply our investment in building a multi-sided, HIPAA-compliant network, which serves as the foundation for our shared success.

The entire state of Mississippi has been upgraded to Pulsara **MED OPS**. In addition to the core Pulsara **ONE** features, this upgrade unlocks Incident Management capabilities for handling Mass Casualty Incidents, Mass Evacuations, and Mass Gatherings, as well as broader regional and statewide initiatives like load balancing, behavioral health coordination, and complex multi-agency operations.

Additionally, EMS has upgraded functionality, and hospitals now have access to enhanced inter-facility functionality, enabling seamless consults and transfer requests between facilities. While Pulsara offers additional optional paid packages, this resource focuses on our infrastructure packages. If you're interested in learning more, feel free to request a demo or ask a Pulsara Team Member any questions.

It's important to note that our team members do not work on commission or have sales quotas—our priority is building a strong, connected network that supports your needs.

EMS

- 01 Watch or Download and Review EMS Executive Summary (5 min)
- 02 Watch EMS to ED Demo (6 min)

Hospitals

- 03 Watch or Download and Review Hospital Executive Summary (4 min)
- 02 Watch EMS to ED Demo (6 min)

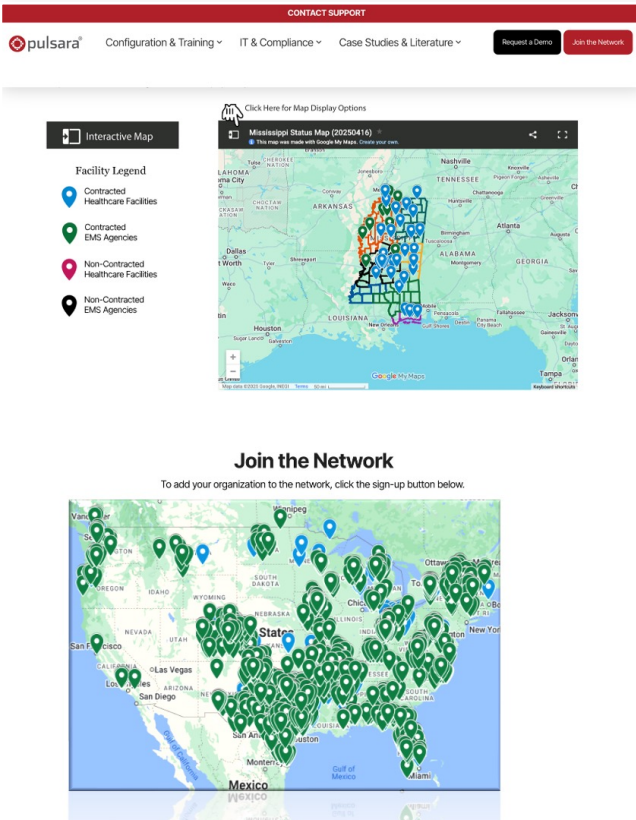

Incidents

EMS & Hospitals

- 04 Watch or Download and Review Incident Executive Summary (5 min)
- 05 Watch Incident Overview Demo (7 min)

We offer separate tracks for EMS and Hospitals, allowing you to quickly grasp the problem, solution, value, and next steps for implementing Pulsara in just 10 minutes—all while seeing the platform in action. If Incident functionality is relevant to your role, an additional 13-minute session provides deeper insight.

While **MED OPS** regions offer a wide range of capabilities, new organizations typically start by focusing on core functionality, including EMS-to-ED communication and Incident Management

Who is on the Network?

Interactive Map

See Who has Signed Up

- Does not represent Implementation or Live Status
- It does not represent organizations that have verbally committed and are working through the sign-up process

Regional Projects

- Located at the bottom of the page and accessible via top navigation
- Displays implementation status of active projects
- Showcases regional projects and workflows
- Highlights other initiatives (Pulsara **MED OPS** regions)

It **CAN** be Done!

- Proven success – thousands of organizations already connected
- Functionality seamlessly extends across state lines

Finding out who is on the network is simple using the interactive map.

If your region is actively implementing Pulsara, visit the Regional Project section to track each organization's progress. This section also provides details on region-specific workflows and projects.

While many of you think about Pulsara as a STEMI and Stroke solution, we're just getting started with Pulsara MED OPS in Mississippi. The bottom image showcases adoption across surrounding states, demonstrating what's possible.

Additional Resources

IT / Compliance / Security

Your organization may require an IT review before joining the Network. The following resources can assist with that review:

- [Compliance & Security Overview](#)
- [IT Configuration Requirements](#)

Business Associate Agreement (BAA)

Your organization may require the execution of a BAA to join the Network.

- Download Pulsara's signed Business Associate Agreement (BAA) [here](#).
- If your organization requires the use of your BAA, please email it to customeronboarding@pulsara.com for review.

For questions regarding the sign-up process, please contact customeronboarding@pulsara.com.

Who to Engage

- EMS: Leadership
- Hospital: ED and Executive Sponsor
- Use this Resource Page to assist with socialization

Sign Up Now

- Sign up to join the queue with no commitment to a timeline or completing onboarding.
- Pulsara will collaborate with you and your region to coordinate training and implementation timelines

Additional Resources

- Assets to help you navigate your internal IT / Compliance / Security process
- Business Associate Agreement (BAA)

Implementation Overview

Engaging Emergency Department leadership is key to a successful rollout. We also recommend securing an executive sponsor, as they will want to understand the regional impact and scope of the project. They can also help navigate your organization's IT adoption process.

The most important step? Sign up as soon as possible. This ensures you're in the queue, allowing us to coordinate your region effectively for a smooth implementation and avoid any false starts.

You'll also find resources to guide you through internal IT and Legal Procurement processes, along with a clear roadmap of what to expect during implementation.
